

## **MARCO RICCI**

Marco is managing [Altereke sas](#) consulting company on recycling and sustainable waste management, senior Expert at [CIC](#) - Italian Composting and Biogas Association and Vice-Chair of the ISWA Working Group on Biological Treatment of Waste.

With a background in solid state physics and a post-graduate specialisation in economic management of environmental resources, Marco has over 27 years of experience in planning municipal waste management systems, designing and evaluating recycling plants (with a focus on composting), planning communication initiatives and active participation in collection systems.

He has designed waste collections schemes for organic waste and packaging waste in complex cities such as Milan, Parma, Bratislava and Prague, prepared the PAYT charge for the Municipality of Bolzano, and worked on strategic planning for biowaste management for the City of São Paulo in Brazil and the Republic of Chile.

As a senior Expert he leads the certification scheme for compostable materials at the Italian Biogas and Composting Association.

Over the past 15 years, he has collaborated with international organizations such as ECN, GIZ, ISWA, FAO and more recently with UNEP and with the World Bank.
